## SUMMARY

Backend-focused Full-Stack Developer with 5 years of hands-on experience building web products using Python and Django. Built and shipped accounting systems, marketplaces, and business platforms serving real users. Focused on backend systems, software architecture, and web security.

## SKILLS

- **Python & Backend Development** Building backend systems using Python, Django, and FastAPI.
- **REST API Design & System Architecture** Designing RESTful APIs and scalable application architectures.
- **Database Design & Data Modeling** Working with relational databases, query optimization, and structured data models.
- **Infrastructure & Deployment** Deploying and maintaining applications with Docker, Nginx, and Linux environments.

## WORK EXPERIENCE

### Founder & Lead Developer — Innofy

3 Years

Founded and operated a software brand delivering custom web solutions for businesses.

Led project planning, backend development, deployment, and technical delivery across multiple client projects.

Built and launched HesabNova, an integrated online accounting platform, and developed additional business products on top of its infrastructure.

Delivered production web applications across accounting, e-commerce, and business management domains.

### Backend Developer (Python) — EliSoft

2 Years

Worked as a backend developer using Python and Django across multiple commercial software projects.

Contributed to the development and delivery of 10+ projects while collaborating with teams and following structured development workflows.

Worked on backend architecture, business logic implementation, API development, and system integration across business platforms.

## SELECTED PROJECTS

### HesabNova.ir

2023 — Present

Designed and developed an integrated online accounting platform for SMBs supporting online and offline sales, e-commerce operations, and multi-user workflows. Built with Django, DRF, Next.js, and Redis.

### BazaarMobleMalayer.ir

2025

Developed a marketplace platform for Malayer's furniture industry connecting workshops, galleries, and production businesses. Built with Django, MySQL, and RTL Persian interface support.

### AlooMarket-Malayer.ir

2026

Built an online grocery platform integrated with HesabNova infrastructure including inventory synchronization and payment processing. Implemented real-time inventory updates, Redis caching, and Zarinpal integration.

## EDUCATION & ABOUT

### B.Sc. in Computer Engineering — In Progress

Backend-focused developer with experience building and launching real-world web products. Interested in software architecture, scalable systems, and turning business ideas into usable applications.
